## Enhancing vaccine efficacy through novel vaccines and delivery technology

报告人: **Lorne Babiuk**教授

加拿大阿尔伯塔大学

时 间: **2016年6月13日10:00**

地 点: 医学院综合楼**701**

主持人: 来茂德 教授

**Dr. Babiuk is a global authority in infectious diseases—particularly virology, immunology and vaccine delivery. Before taking up his current position as University of Alberta’s Vice-President Research, Dr. Babiuk founded an internationally recognized research institute, the Vaccine and Infectious Disease Organization (VIDO) in Saskatoon. Under his leadership, VIDO grew into an internationally recognized research powerhouse and launched a \$140 million bio-containment facility—the only one of its kind in Canada.**

**He has published over 500 manuscripts, been awarded 40 patents and trained over 100 PhD and post-doctoral fellows who have gone on to successful careers in academia, industry and government. Dr. Babiuk’s manuscripts have been cited over 14,000 times with an H factor of 56 and he continues to contribute to the advancement human and animal health.**

**In addition to being University of Alberta’s Vice-President Research, Dr. Babiuk serves on numerous committees helping to set science policy in Canada and around the world.**

**欢迎广大师生踊跃参加!**
